- C. The b..... is sitting in the stroller.
- D. The father and daughter are looking at e..... other.

(8 points)

H. Reading Comprehension (20 points)

Answer the questions that follow the text.

Seahorses

1. Seahorses are strange animals. Their head looks like a horse's head but they are not horses. They have a tail that looks like a monkey's tail. They are fish but they look like tiny dragons. Seahorses live in shallow, warm water. They do not like deep or cold water. There are more than 35 kinds of seahorses, and they come in different shapes and sizes. Some of them are five centimeters long, but others might be 25 centimeters.

2. Seahorses cannot bite or chew their food because they have no teeth. They are not good hunters because they are very slow animals. They open their mouths and wait for small animals and fish eggs to come by and then simply suck them into their mouths.

3. A father seahorse helps the mother. The mother lays the eggs and gives them to the father. The father has a special sack or pouch in which it keeps the eggs until they hatch. After they hatch, the small seahorses stay near their father.

4. Seahorses are very popular fish. People all over the world like to watch them. In some countries, like China and Thailand, people fish them and use them to make medicine. This makes life difficult for seahorses and their numbers in the world are getting smaller and smaller. If people do not stop fishing **them**, they might soon disappear!

Questions

63. Seahorses are a kind of: (paragraph 1)

- A. dragons.
- B. fish.
